- **Disk :** SSD 240GB/1TB
- **OS :** Windows Server Multipoint

Artur's comments to use vCloudPoint S100
The solution is strongly preferred for economic reasons, it's easy to use. The terminal is solidly constructed, ON/OFF switch allows quickly enable or disable the device which greatly facilitates the handling of unexpected events associated with the work at the station. Additional USB ports and audio for use at work are significant benefits too.
